Multiple Adoption Models to
finance the project

Timely Completion

Timely commissioning and
handover of the project

Safety and Quality

Guaranteed safety and quality
standards

Asset Management

Dedicated services to maintain and
ensure long life of solar plants

RENEWABLE SOLUTIONS

SOLAR ROOFTOP

GROUND MOUNT

STEAM TURBINES

SOLAR CARPORTS

BIPV SOLUTIONS

HYBRID MODLES

SOLAR POWER AS A SERVICE (SPAAS)

Innovative and competitive business model Solar Power As A Service (also referred to as OPEX) offers you a compelling and risk-free green energy solution

Benefits of SPAAS

ZERO INVESTMENT required from customer

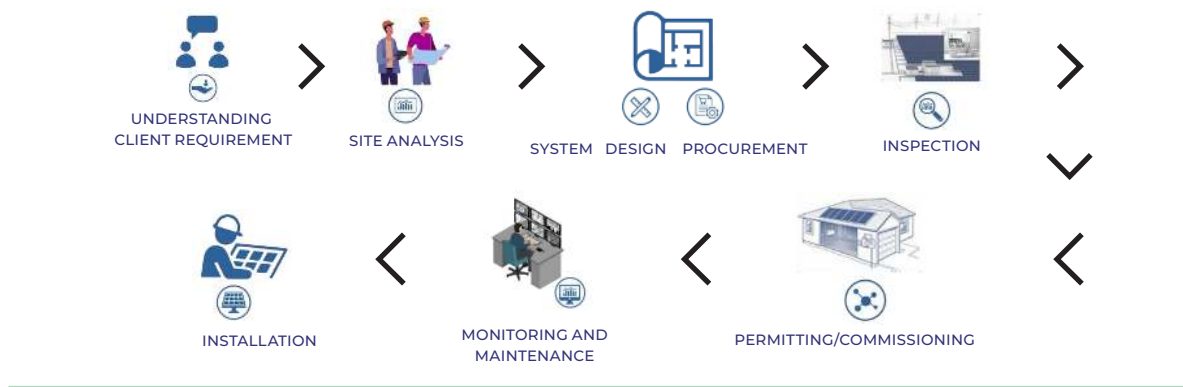

GUARANTEED SAVINGS for every unit of solar electricity purchased

NO TECHNICAL, FINANCIAL or PERFORMANCE RISK for the customer

END-TO-END DELIVERY of the solar plant

HASSLE-FREE MAINTENANCE of plant ensuring high performance

VIJISUN SPAAS MODEL STRUCTURE

ROOFTOP (ON-SITE) SOLAR

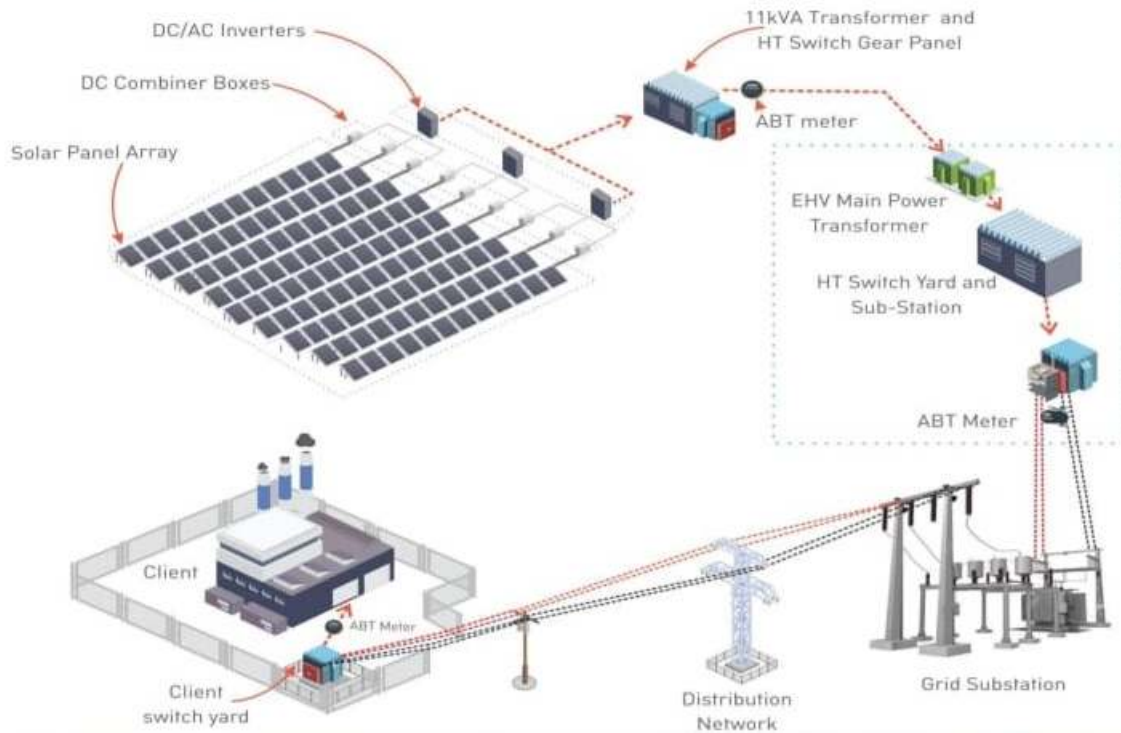

What if your rooftop could be a power producer?

Pay per unit of energy generated from the solar plant on your premises
Significant cost savings for businesses

Key Features:

1. You sign a Power Purchase Agreement (PPA) with Vijisun Energie at a tariff lower than grid tariff
2. Vijisun Energie facilitates up front investment & sets up the plant on your premises
3. You pay for every unit of electricity generated.

How a solar park works?

Project Development
CAPEX, OPEX & Group Captive

**Engineering, Procurement
& Construction**

**Asset Management
Services**

OPEN ACCESS (OFF-SITE) PROJECTS

Not enough area within your premises for an onsite plant?

Wheel lower-than-grid cost solar energy from our off-site (Open Access) park to your business Significant cost savings for businesses

Key Features:

1. You sign a Power Purchase Agreement (PPA) with Vijisun Energie a tariff lower than grid tariff
2. You pay for every unit of energy purchased under openaccess
3. Vijisun Energie remote monitoring system provides accurate scheduling

Choose what suits you

CAPEX

Through a CAPEX model we build your solar power plant at a capital cost. We undertake end-to-end services from design to commissioning. The plant is handed over to the client after commissioning. Complete turnkey solutions.

Benefits of CAPEX model

- Complete ownership of the power plant.
- Return of Investment within 2–4 years of commissioning.
- Provision to claim Tax Benefits.

OPEX

Also known as a BOOT model, we finance, build and operate the solar plant, where you buy power from us for a fixed period of time. The plant ownership is transferred to the client after agreed period of time.

Benefits of OPEX model

- ZERO investment
- Lower tariffs than market rate.
- No Operational and Maintenance costs.

Customer signs the PPA & project is financed by Vijisun Energie.

Installation is done by our experienced project team.

Operation & Maintenance is our responsibility for PPA term.

Avoid Upfront Capital Cost And Performance Risks

Invest In Your Business While We Take Care Of Your Clean Energy Needs
